Note:

- 55° Whitworth thread form, modified with truncated crest and cleared root, for the inspection of product threads to ISO228-1 or BS2779.
- G (internal and external straight).
- There are two classes of external threads: "A" (close fit) and "B" (free fit). Class "B" is used unless Class "A" is specified. Call for Class "A" ring and set plug gage pricing.

* 2 Handles

For TiN coated thread work plugs – call Swanson.
